

Scientific Glassblower Needed

JJ Quartz manufacturer of high quality quartz ware mainly for the scientific instrument industry require a full time skilled technician. You should have experience of working with high quality fused silica.

You will have the ability to read and interpret drawings and have experience in a similar environment. The successful applicant must be self-motivated and have the ability to work independently organising workload and monitoring stock levels. It is anticipated that this position will allow the person to grow with the business into a supervising and training roll over time.

The ability to produce technical drawings would be a distinct advantage.

Currently located near Macclesfield, Cheshire, the business is hoping to relocate to the South West of England later this year and the successful applicant must be flexible and happy to relocate.

We offer a competitive salary, flexible working hours along with 25 days annual leave.

Applications with CV, or for more information contact John Turnock.
